

Space Travel Timeline

1940 - 2015

twinkl

1942

The first rocket called the V2 was launched. It was designed by a German engineer called Wernher Von Braun.

1949

The first monkey is sent to space. His name was Albert II and was a Rhesus monkey. He flew 83 miles away from Earth!

1940

1945

1950

1947

The first animals were sent to space to see how they would react. The fruit flies were sent to space with some corn for food.

A horizontal timeline bar with a green segment from 1950 to 1955 and a blue segment from 1955 to 1960. Callout boxes are connected to the timeline by lines. The background features a space-themed illustration with a rocket, a satellite, and an astronaut.

1957

Laika, the Russian space dog, became the first animal to orbit the earth. Her name means 'barker' in Russian.

1957

On the 4th October, Russia launched Sputnik, the first satellite into space. 'Sputnik' means 'satellite' in Russian. From this day on, the space age had begun!

1950

1955

1960

1959

Russian and American scientists were in a competition to send a spacecraft to the moon. Russia succeeded first. A space probe called Lunar 2 was sent and it travelled at such an immense speed that it would have killed a person if they were inside it!

1961

Yuri Gagarin became the first man in space.

1963

Valentina Tershkova was the first woman in space and a crater on the far side of the moon is named after her!

1960

1965

1970

1969

Neil Armstrong and Buzz Aldrin set foot on the moon! The first words said on the moon were 'the Eagle has landed'.

The background features a stylized illustration of a space shuttle in the upper left corner, a large red planet (Mars) with dark spots in the center, and an astronaut in a white suit in the lower right corner. The scene is set against a dark blue space background with white stars.

1973

A Russian probe is sent to explore Mars. It stayed in orbit for a year but it was destroyed when the parachute failed to open upon landing.

1970

1975

1980

1980

1985

1990

1986

A terrible tragedy occurs as a rocket explodes shortly after it launches, killing seven astronauts. This happened on 28th January and reminded everyone just how dangerous space travel is and how brave astronauts are.

1991

Helen Sharman, born in 1963, Sheffield, won a competition to become the first British astronaut in space. She had to undergo 18 months of intensive training and was part of a mission to the MIR space station.

1990

1995

2000

A horizontal timeline bar is positioned in the center of the page. It is divided into three segments: a yellow segment from 2000 to 2005, a yellow segment from 2005 to 2009, and an orange segment from 2009 to 2010. Two blue dots are placed on the timeline: one at the year 2000 and another at 2004. A blue line connects the 2000 dot to a yellow text box above the timeline. Another blue line connects the 2004 dot to an orange text box below the timeline. The background features a space-themed illustration with a space shuttle in the top left, an astronaut in the bottom right, and a planet's horizon in the distance.

2001

American millionaire, Dennis Tito, became the first space tourist in a Russian spacecraft. He paid 20 million dollars for the privilege!

2000

2005

2010

2004

The first private space flights became available. Tickets for places on the spacecraft are available to buy now!

2015

Scientists find evidence of liquid water on Mars for the first time. This furthers the possibility of sustaining life on the planet.

2010

2015

2020

2015

Tim Peake became the first British ESA Astronaut to visit the International Space Station.
