

6th Class: Week beginning Monday, 11th January

Good morning everyone. Happy New Year and happy new school term. I hope you are all keeping well and that you all enjoyed your Christmas holidays and had a relaxing and fun-filled break. This is not the start to the New Year that we hoped for but hopefully we will soon be back in our classroom again. In the mean time I am setting out some of our work for this week here. Other work, messages and resources will be posted directly to Seesaw during the week with instructions from me on what you need to do.

If you have any questions you can send me a message via Seesaw in the following ways: you can type a note, send a voice recording or a video recording or you can email the school and I will get back to you.

Please lay out your written work as you have to lay it out in school i.e. draw margins, write the date, page no. and book, number all answers to questions, write neatly and use correct punctuation.

I would encourage you to keep up your reading for pleasure during this time. The publishers of The Primary Planet have been in touch to let me know that they cannot deliver magazines at this time but they will be delivered when the school reopens and they have uploaded the January edition of The Primary Planet online. You can access it via this link. <http://www.newsmagmedia.ie/Previews.aspx> Click on the red box Issue 98 Jan. 2021. This week there is a daily Mental Maths quiz on the Primary Planet website, as well as a daily “Music of 2020” quiz. If you log your answers online you could be in with a chance to win a prize at the end of the week. I would encourage you to try these quizzes.

I look forward to talking to you online in Seesaw.

Take care.

Ms. Gill

(You can view the Mental Maths sheet on the website or in SEESAW)

Topic: Fractions

This week we are going to revise the areas of fractions we covered before the Christmas holidays through problem solving. It is very important to show full working out.

Monday: Qs. 1-6 P. 38 Textbook (T.B.)

Tuesday: QS. 7-12 P,38 T.B. (when asked to order fractions with efferent denominators, it is important to change them all to the same fraction family first i.e. find the common denominator, then it is much easier to order them.

e.g. $\frac{3}{6}$ $\frac{1}{9}$ $\frac{2}{3}$ Put these fractions in order to size from the smallest to the largest

First ask yourself what is the common denominator for the numbers 6, 9 and ? - what is the lowest number these three numbers will divide into evenly?

Ans: 18

Write each fraction as its equivalent fraction out of 18

$$\frac{3}{6} = \frac{9}{18}$$

$$\frac{1}{9} = \frac{2}{18}$$

$$\frac{2}{3} = \frac{12}{18}$$

So in order of size starting with the smallest fraction: $\frac{1}{9}$ $\frac{3}{6}$ $\frac{2}{3}$

Wednesday: Qs.13-16 P. 38 T.B

Thursday: Qs, 17-20 P. 38 T.B.

Friday: Revision: P. 65 T.B. Qs2,3 and 4.

History:

Nelson Mandela.

We will be learning about Nelson Mandela.

Have you heard of Nelson Mandela before?

To begin with, I would like you to write in Seesaw (use the note icon) what you know about Nelson Mandela before we begin this topic just like when we fill in a KWL chart in school (you do not need to research anything about him before you do this, I just want to find out what you know before we begin). If you do not know anything about who Nelson Mandela is, you can note this. I would like you to write down any questions you have about Nelson Mandela. I will add notes and assignments on this topic to SEESAW.

Geography:

Key vocabulary:

meteorologist: a person who studies the weather and makes forecasts about the weather based on the evidence/data they have collected.

Weather lore: Sayings about the weather. These sayings have developed over time based on people's observations of the weather and have been passed on by word of mouth e.g. Oak before ash we are in for a splash, ash before oak we are in for a soak i.e. if the leaves on the oak tree appear before the leaves on the ash tree, there will be some rain in the summer, if the ash tree's leaves appear before the oak's leaves, we will get a soaking (lots of rain).

Clouds.

See notes added to Seesaw

Read P. 36

Activity A P. 36 Geography Quest (Look at the diagram in the Clouds document in Seesaw to help you identify clouds you see.)

Read the weather lore on P. 37. Do you know any other weather lore, ask your parents or maybe your grandparents or try to research weather lore and make a note of it.

Activity B P.38

Activity C: Read the weather record and answer the questions which follow.
